Technical Work Group

Action DE0701:
TWG Adhoc work areas

TWG Adhoc work areas

- The adhoc work areas log captures all the issues that naturally get raised through discussions at TWG
- DESC have the responsibility of reviewing the work areas and prioritising those it wishes TWG to focus on during the next Autumn and Winter period
- A review session of the latest list of adhoc work areas was carried out at the DESC meeting on 10th July 2013

TWG Adhoc work areas

- The work areas are recorded on the table shown in this presentation (slides 4 to 6)
- The table has been updated to reflect the status of the work that was carried out last Autumn/Winter
- Items highlighted in green on the adhoc work area log represent the completed items
- Table also shows those items where analysis is 'ongoing' and those where DESC have ranked the work area based on its priority to the group

TWG Adhoc work areas

Ref No.	Source	Description	Status
1	TWG 20/04/12	Review of 'spike' validation rules applied to sample data during Spring (and Autumn) analysis	TWG Priority (4)
2	TWG 20/04/12	Review of appropriateness of current EUC definitions for Small and Large NDM	Ongoing
3a	TWG 20/04/12	Investigate possibility of providing TWG with data during the Spring analysis WAR Band definitions review	Completed
3b	TWG 20/04/12	Consider the application of weather correction to WAR Bands	On Hold
4	TWG 23/05/12	Further consideration given to parameters / tests used for defining Warm Weather Cut off models	TWG Priority (3)
