

Performance Assurance Committee Meeting

Summary – 17th October 2023

KEY MESSAGES

▪ **AREAS OF PAC CONCERN**

- **Annual Review 2023:** The Performance Assurance Framework Administrator (PAFA) have now issued the 2023 Performance Assurance Framework Document Annual Review out for consultation to the industry with responses due by 30th October 2023.
- **Review of New Modifications for Performance Assurance Impact:** PAC were made aware of five new modifications for consideration. PAC determined that one of these modifications may have an impact on Performance Assurance;
 - [0856 – Introduction of Trials for Non-Daily Metered \(NDM\) Demand Side Response \(DSR\)](#) which is to be monitored monthly.
- **PAC Request For Information (RFI) Update – Product Classes 3 and 4:** The PAC would like to thank the industry for the positive response in regard to the Request for Information issued earlier this year for Meter Reading submission for Product Classes 3 and 4. The PAFA will be writing to the industry with a summary of outcomes and next steps.

▪ **SHIPPER PERFORMANCE ANALYSIS**

- **2A.6/2B.6 Meter Read Validity:** PAFA are to issue observational letters to seven Shippers where there is a correlation between high meter read validity (MRV) failure volumes and low read performance levels to highlight this area and provide suggestions..
