

**E.ON reply to action DNCFM 0601:**

Following the DNCFM on 20<sup>th</sup> June where stakeholders were asked if the 'Domestic Customer Bill Impact' section should be retained in the MOD186 reports when the new versions are introduced in September I have taken this question back to my team at E.ON. We have decided that we would vote to retain the customer bill impact table in the MOD186 reports as they are a useful component to have.

Please accept this as E.ON UK's response to the question posed to suppliers, and I am happy to discuss at the next DN CFM meeting in September if required.

Kind regards,  
Bridget
