Support or oppose implementation?	Support
Relevant Objective:	<p>a) <u>None</u> – we are not persuaded that the proposal will further this relevant objective as it ought not to have any bearing on the operation of the operation of the pipeline system</p> <p>c) <u>Positive</u> – the proposal will help to improve access to the pipeline system by enabling less complex projects to secure capacity more efficiently.</p> <p>d) <u>Positive</u> – providing cheaper and quicker access to capacity is consistent with promoting competition between gas shippers and gas suppliers. Regarding NTS exit capacity, however, there is scope to improve the PARCA process to provide shippers who may want additional capacity at potential donor substitution exit points a fairer opportunity to compete for it – but this is a situation that already exists.</p>

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

The proposal has been raised in support of Project CLoCC that has the objective of providing quicker and less costly connections to the NTS. Enabling an applicant to secure capacity in a more efficient manner where possible is critical to the achievement of this goal and this modification proposal will help to achieve this. We believe that the proposal will help to further code relevant objectives c) and d).
