Support or oppose implementation?	Support
Relevant Objectives:	f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We support the implementation of this modification proposal which is a critical enabler to the CDSP's ongoing engagement in the CSS procurement phase of the Faster & More Reliable Switching programme. We agree with the proposer that the proposal meets relevant objective (f), the promotion of efficiency in the implementation and administration of the code.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

In accordance with the urgent timetable.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes, we have no comments on the legal text.

Are there any errors or omissions in this Modification that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No

Please provide below any additional analysis or information to support your representation

The utilisation of existing industry systems provides an opportunity to deliver a less complex industry solution and potentially one which will be less costly for end consumers. Without approval of this modification proposal, the opportunity for the CDSP to continue within the procurement process will cease.
