Your Reference: UNC Modification Proposal 0664

UNC Modification Proposal 0664 - Transfer of Sites with Low Read Submission Performance from Class 2 and 3 into Class 4

Dear Bob,

Thank you for your invitation seeking representations with respect to the above Modification Proposal which Cadent would like to support.

Do you support or oppose implementation?

Support

Relevant Objective:

d) Positive

Reason for support/opposition:

This modification, if implemented, would ensure Supply Points are in the appropriate Class which matches their ability to provide reads.

This should help with UIG by ensuring that those Supply Points which are unable to provide the correct level of reads are removed from Classes 2 and 3 where they would have received an unwarranted benefit of a lower AUG allocation.

We also welcome the ability for Xoserve to be able to recover any costs incurred moving Supply Points to Class 4 as this should incentivise Shippers to carry this out themselves in a timely manner.

Implementation

Implementation of the modification should take place as soon as any changes to relevant parties systems/processes are in place.

Impacts and Costs

Not known at this time.

Q1: Consider whether proposal has an impact on Shippers who ship for other parties?

No further comments

Legal Text

As Legal Text provider we are satisfied that the provided text meets the intent of the Modification.

Are there any errors or omissions in this Modification Report that you think should be taken into account?

We have not identified any errors or omissions.

Please provide below any additional analysis or information to support your representation

Nothing further to add.

We trust that this information will assist in the compilation of the Final Modification Report. Please contact me on 07884 113385 (andy.clasper@cadentgas.com) should you require any further information.

Yours sincerely,

Andy Clasper
