Support or oppose implementation?	Support
Relevant Objective:	f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We support this modification as it reorders the UNC text into the same order as the Faster Switching SCR text. It will therefore give people time to get used to the revised order and therefore to better able to identify the changes from the Faster Switching text. It therefore furthers relevant objective (f) efficiency in the administration of Code.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

This satisfies the self-governance criteria as the proposer has ensured that the changes do not include any changes to text other than the reordering and consequential changes and minor typographical error corrections.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

We agree that implementation could be sixteen business days after a modification panel decision to implement subject to no appeal being raised.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

We are confident that the rigorous scrutiny by the proposer has identified and corrected any errors in the original draft.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No

Please provide below any additional analysis or information to support your representation
