

UNC Withdrawal Notification

0680VS - UNC Changes as a Consequence of 'no deal' United Kingdom Exit from the European Union

Date: 18 February 2020

Dear Colleague,

National Grid has decided to withdraw the modification.

As the UK has now left the EU with a withdrawal agreement - we are now in the transition period which has a firm deadline of the end of 2020, National Grid have considered the next steps for this Proposal. On the basis that if any changes are required as a consequence of the progress, or otherwise, of negotiations in this transition period, the existing Proposal is likely to need some fairly significant redrafting (and potentially further consultation) given it is based on the premise of no withdrawal agreement being agreed between the UK and EU upon initial exit.
