

EXPLANATORY TABLE

MODIFICATION 0672

TARGET, MEASURE & REPORT PRODUCT CLASS 4 READ PERFORMANCE

Reference	Explanation
Transportation Principal Document	
Section M – Supply Point Metering	
5.9.1(f)	<p>Identifies three groups of Class 4 Supply Meters, by reference to Annual Quantity, Meter Read Frequency and the nature of the Supply Meter installed at the Supply Meter Point.</p> <p>Required on the basis read performance will be measured and reported on separately for each of the three groups, Groups 1, 2 and 3.</p>
5.9.18	<p>Identifies the target performance for each of Groups 1, 2 and 3; the Target Monthly AQ Read Percentage for Groups 1 and 2 and the Target Annual AQ Read Percentage for Group 3. The target percentages will be set out in the Performance Assurance Reports Register (see Section V16.5) and will be subject to governance of that document.</p> <p>The Actual Monthly AQ Read Performance and the Actual Annual AQ Read Performance is then calculated each calendar month by reference to the Annual Quantity percentage of the User's portfolio for each Group in relation which a Valid Meter Reading was submitted during the relevant window.</p>

5.9.19	Contains the requirement a User ensure that its read performance for each of Groups 1, 2 and 3 each calendar month is not less than the target performance.
5.9.20	Makes clear which Annual Quantity is used in determining whether a Class 4 Supply Meter is in Group 1, 2 or 3 and that for the purposes of Group 2 a Smart Meter or Advanced Meter must have been installed for all days in the relevant calendar month.
5.9.21	Where the Meter Read Frequency changes mid-month the Supply Meter (and its Annual Quantity) will not be included when calculating the User's performance for the relevant calendar month.
