

Representation - Draft Modification Report UNC 0645S Amending the oxygen content limit in the Network Entry Agreement at South Hook LNG

Responses invited by: **5pm on 27 April 2018**

To: enquiries@gasgovernance.co.uk

Representative:	Nnamdi Nebo
Organisation:	National Grid Grain LNG Ltd
Date of Representation:	24/04/2018
Support or oppose implementation?	Support
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

With gas (LNG) import dependency projected to increase (as illustrated in National Grid's FES scenarios), our view is that the UK needs to ensure it is able to attract and process LNG from a wide range of global sources. This Modification seeks a very modest increase of the oxygen content in South Hook LNG's NEA and the positive impact on security of supply warrants our support.

Self-Governance Statement: Please provide your views on the self-governance statement.

We agree that this is suitable for Self-Governance and would also be consistent with other similar Modifications 0561S and 0581S.

Implementation: What lead-time do you wish to see prior to implementation and why?

As soon as is reasonably practicable.

Impacts and Costs: What analysis, development and ongoing costs would you face?

We do not believe this will have any negative impact on Grain LNG.

Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?

N/a

Are there any errors or omissions in this Modification Report that you think should be taken into account? Include details of any impacts/costs to your organisation that are directly related to this.

None

Please provide below any additional analysis or information to support your representation

None
