

Representation - Draft Modification Report UNC 0712S

Amending the oxygen content limit in the Network Entry Agreement (NEA) at the St Fergus SAGE plant

Responses invited by: **5pm on 19 March 2020**

To: enquiries@gasgovernance.co.uk

Please note submission of your representation confirms your consent for publication/circulation.

Representative:	Henrik Larsén
Organisation:	Lundin Norway AS (org no. 986 209 409) ("Lundin")
Date of Representation:	12 March 2020
Support or oppose implementation?	Support
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

Lundin support the proposed UNC Modification because it will enable increased volumes of Norwegian gas from the Utsira High area on the Norwegian Continental Shelf to be landed at the SAGE Gas Terminal and delivered into the National Transmission System (NTS). Addition gas delivered into the NTS promotes competition in the gas market and enhances security of gas supply in the UK.

Self-Governance Statement: Please provide your views on the self-governance statement.

Other UNC modifications relating to oxygen dispensation are self-governing and the proposed modification should be dealt with consistently.

Implementation: What lead-time do you wish to see prior to implementation and why?

Timely implementation following approval of the UNC Modification would be appreciated.

Impacts and Costs: What analysis, development and ongoing costs would you face?

Implementation of requested modification will not involve additional cost on the shippers.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes

Modification Panel Members have requested that the following questions are addressed:

Q1: Please provide clear views and supporting evidence on the self-governance status of this modification focusing, in particular, on whether this proposal is likely to have a material impact upon competition in the shipping, transportation or supply of gas.

Proposal will enable supply of gas from new sources to the UK market and increase the competition. The proposal will also enhance security of supply for the UK.

Q2: Respondents to provide a view as to whether or not this modification should be [re]designated as self-governance.

Other UNC modifications relating to oxygen dispensation are self-governing and the proposed modification should be dealt with consistently.

Q3: Please provide your views on the self-governance status.

No objections

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No error/omissions identified

Please provide below any additional analysis or information to support your representation

Nothing to add
