1 Summary

What

The Uniform Network Code (UNC) was drafted originally many years ago when the approach to drafting defaulted to gender specific terms. The current day approach to drafting is very different with gender now reflected with numerous categories. It is, therefore, proposed to remove specific gender references replacing them with neutral terms.

Why

To ensure the UNC remains up to date, robust and in line with current day references, it is suggested to have an amendment to remove gender specific references to ensure the UNC remains aligned to the newer Codes, such as the Retail Energy Code (REC) which isn't defaulting to gender referencing but ensuring it remains neutral.

How

Updating any specific gender references such as 'he', 'him', 'his', 'her', 'Chairman' etc to neutral terms such as 'their', 'them', 'they' and 'Chairperson'.

2 Governance

Justification for Self-Governance

This Modification seeks to make cosmetic changes to the Code and does not change the intention of any of the clauses as drafted. The nature of the changes can therefore be reviewed as housekeeping edits and therefore meets the Self-Governance criteria as the Modification does not have a material impact on gas consumers, competition, pipeline operations, security of supply, governance procedures and does not discriminate between code parties.

Due to the need to ensure the correct neutral term is used for each current day reference it does not meet the fast-track criteria and would require workgroup discussion and review of the legal text.

Requested Next Steps

This Modification should:

- be considered a non-material change and subject to Self-Governance
- be assessed by a Workgroup.

Following assessment by Workgroup, participants confirmed that the Modification should remain as Self-Governance

3 Why Change?

Times have changed since the UNC was originally drafted, previously gender specific references were the standard but today this is not the case, with new codes such as the Retail Energy Code (REC) moving away

from gender referencing which E.ON believe should be the case with the older more traditionally drafted codes.

As the Proposers, E.ON support this approach and believe that codes such as the UNC should also complete the amendments from gender specific terms to gender neutral throughout the document.

There is no legal requirement to complete this but to ensure code remains up to date and robust E.ON believe that removal of these specific terms would improve the code and modernise it whilst still keeping it as the contract between the Pipeline Operators and Pipeline Users.

A high-level review has been conducted and throughout the UNC documents we note that gender specific references occur not only in the main documents but also in the ancillary and guidance documents, to avoid further neutral reconciliation activities being completed we would seek to address all references via this Modification and not complete things piecemeal. A summary of the volume of references is below:

Chairman	34
His	74
He	39
Him	12
Her	1
She	0
Total	160

See Appendix 1 for breakdown of where references occur throughout the UNC documents.

4 Code Specific Matters

Reference Documents

- General
- UNC - the Summary Part I
- Transportation Principle Document
- Offtake Arrangement Document
- BG Document 76 (Temperature/Demand Methodology)
- Measurement Error Notification Guidelines
- Independent Gas Transporter Arrangements Document

Knowledge/Skills

Working knowledge of the UNC.

5 Solution

The solution is to update any specific gender references such as 'he', 'him', 'his', 'her' 'Chairman' etc to neutral terms such as 'their', 'them', 'they' and 'Chairperson'.

Specific gender references are to be replaced with the most suitable neutral term for the sentence.

Where the current term relates to a single person the translation to the neutral term needs to retain that intent. This solution is to amend all specific gender references within the UNC and UNC Related Documents.

For the avoidance of doubt whilst such documents as BG Document 76 and the UNC Summary Document do not form part of UNC covered by amendment by Legal Text, we believe these should also be considered by industry and where necessary amended within the correct relevant governance and consulted upon.

6 Impacts & Other Considerations

Does this modification impact a Significant Code Review (SCR) or other significant industry change projects, if so, how?

It is not believed to have an impact on the Switching or Code Consolidation SCR.

Consumer Impacts

None, this is a housekeeping change.

Cross Code Impacts

Although no direct impacts to any other codes it is recommended that CACoP are consulted to ensure neutral terms are introduced in all codes.

A Modification has also been raised in the IGT UNC, (Modification number IGT147).

EU Code Impacts

None, this is a housekeeping change.

Central Systems Impacts

None.

7 Relevant Objectives

Impact of the modification on the Relevant Objectives:	
Relevant Objective	Identified impact
a) Efficient and economic operation of the pipe-line system.	None
b) Coordinated, efficient and economic operation of (i) the combined pipe-line system, and/ or (ii) the pipe-line system of one or more other relevant gas transporters.	None
c) Efficient discharge of the licensee's obligations.	None
d) Securing of effective competition: (i) between relevant shippers; (ii) between relevant suppliers; and/or (iii) between DN operators (who have entered into transportation arrangements with other relevant gas transporters) and relevant shippers.	None
e) Provision of reasonable economic incentives for relevant suppliers to secure that the domestic customer supply security standards... are satisfied as respects the availability of gas to their domestic customers.	None
f) Promotion of efficiency in the implementation and administration of the Code.	Positive
g) Compliance with the Regulation and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators.	None

This change delivers Objective f) by ensuring the UNC remains efficient, effective and robust with its approach to gender referencing. This is essentially a housekeeping change to translate the specific terms to neutral terms, it does not seek to change the intention of any of the clauses but keeps the UNC modern in its drafting approach.

8 Implementation

As Self-Governance procedures are proposed, implementation could be sixteen business days after a Modification Panel decision to implement, subject to no Appeal being raised.

9 Legal Text

Legal Text has been provided by Cadent and is included in this report. The Workgroup has considered the principles by which the Legal Text has been created and is satisfied that it meets the intent of the Solution.

10 Consultation

Panel invited representations from interested parties on 18 March 2021. The summaries in the following table are provided for reference on a reasonable endeavours' basis only. It is recommended that all representations are read in full when considering this Report. Representations are published alongside this Final Modification Report.

Of the 4 representations received 3 supported implementation and 1 offered qualified support.

Representations were received from the following parties:

Organisation	Response	Relevant Objectives	Key Points
E.ON	Support	f) - positive	<ul style="list-style-type: none"> • Supports the updated neutral references across the UNC documents. • Supports Self-Governance status for this Modification as they believe the changes proposed are administrative and do not amend the intent of the requirements under the UNC. • Supports implementation as soon as practicable in line with Self-Governance guidelines. • Does not envisage any costs as this Modification proposes administrative changes only. • Believes the legal text delivers the intention of the Solution.
Cadent	Support	f) - positive	<ul style="list-style-type: none"> • Supports this Modification. • Agrees it is important to ensure the UNC is up to date, robust and 'in line with current day references'. • Supports implementation of the Modification sixteen Business Days after the Modification Panel decision. • Believes the legal text may contain a small number of potential ambiguities in nine (9) sections. As the provided legal text was not reviewed at Workgroup, proposes one more Workgroup to ensure no further ambiguity exists, for which they will provide alternative text.
Northern Gas Networks	Qualified Support	f) - positive	<ul style="list-style-type: none"> • Provides Qualified Support for this Modification as they agree the changes proposed should ensure that the UNC remains relevant and removes dated gender specific pronouns, furthering Relevant Objective f), but notes the legal text does not fully meet the intent of the Modification. • Agrees that this Modification should be subject to Self-Governance procedures as it is primarily seeking to update the UNC to align with current legislation. • Believes this Modification could be implemented as soon as possible after the UNC Panel approval, subject to no appeal

			<p>being made.</p> <ul style="list-style-type: none"> • Have not identified any potential costs or impacts as a result of this change. • Believes that the majority of the legal text should deliver the intent of the Modification, however there are some instances where, as drafted, the clause becomes ambiguous or does not make sense; change marked examples are provided in their representation. • Notes a full assessment of the remainder of the legal text changes has not been carried out as it is expected that the Proposer and legal text advisor will work through the document to ensure that each clause is re-read with the changes included to ensure that it remains clear and continues to make sense and identify and correct any further amendments when correcting those identified above.
ScottishPower	Support	f) - positive	<ul style="list-style-type: none"> • Supports what the Modification seeks to achieve by updating specific gender references within UNC documentation to a more current and relevant text. This will be in line with the changes already implemented in IGT UNC147. • Agrees with the Self-Governance statement. • Believes no lead time would be required as this is a housekeeping update to UNC documentation and implementation could be as soon as possible. • No development or ongoing costs have been identified as a result of this Modification.

Please note that late submitted representations will not be included or referred to in this Final Modification Report. However, all representations received in response to this consultation (including late submissions) are published in full alongside this Report and will be taken into account when the UNC Modification Panel makes its assessment and recommendation.

11 Panel Discussions 15 April 2021

Discussion

The Panel Chair summarised that Modification 0741S would update any specific gender references such as ‘he’, ‘him’, ‘his’, ‘her’, ‘Chairman’ etc to neutral terms such as ‘their’, ‘them’, ‘they’ and ‘Chairperson’ in the Uniform Network Code.

Panel Members considered the representations made noting that, of the 4 representations received, 3 supported implementation, and 1 offered qualified support.

Panel Members noted that NGN’s consultation response had highlighted some areas of Legal Text which appeared to warrant further consideration and discussed whether returning the Modification to Workgroup would allow this to be rectified. Cadent as Legal Text provider agreed.

Panel Members agreed that concerns had been raised during consultation responses. Panel Members agreed that these could potentially be rectified through further consideration at Workgroup for 1 month.

Consideration of the Relevant Objectives

Not considered by Panel.

Determinations

Panel Members then determined (13 Panel votes were available for the determinations):

- That there were no new issues requiring a view from Workgroup, by unanimous vote (13 out of 13).
- Modification 0741S be issued to Workgroup 0741S with a report to be presented to the 20 May 2021 Panel, by unanimous vote in favour (13 out of 13).

12 Workgroup Supplemental Report

At the April Workgroup, revised text was provided by Cadent to address a concern raised in the consultation that some of the original text could be construed as ambiguous. Specifically, where two parties are referenced in the same paragraph, the use of gender-neutral non-specific terminology could make it difficult to determine which party was responsible for undertaking which action.

To remedy this, a number of words in the legal text have been revised to specify the relevant party and these are captured in detail in the minutes of the Workgroup held on 22 April 2021¹.

To conclude, the Workgroup-validated revised legal text is now included in this Workgroup Report and is ready for Panel to discuss and proceed to an implementation vote.

13 Panel Discussion 20 May 2021

Discussion

The Panel Chair summarised that Modification 0741S would update any specific gender references such as 'he', 'him', 'his', 'her', 'Chairman' etc to neutral terms such as 'their', 'them', 'they' and 'Chairperson' in the Uniform Network Code.

Panel Members considered the work undertaken by Workgroup in reviewing the Legal Text concluding that the Legal Text has been reviewed.

A Panel Member confirmed that the issues flagged in the consultation response from Northern Gas Network have now been addressed to her satisfaction.

Panel Members were content that the issue has now been satisfactorily resolved.

¹ [Workgroup 741S Minutes: 22 April 2021](#)

Consideration of the Relevant Objectives

Panel Members considered relevant objective f) *Promotion of efficiency in the implementation and administration of the Code*, agreeing that implementation would have a positive impact by ensuring the UNC remains efficient, effective, modern and robust with its approach to gender referencing.

Determinations

Panel Members voted unanimously that Modification 0741S does not have an SCR impact.

Panel Members voted unanimously that no new issues were identified as part of consultation.

Panel Members voted unanimously to implement Modification 0741S.

14 Recommendations

Panel Determination

Panel Members agreed that Modification 0741S should be implemented.
