Support or oppose implementation?	Support
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We support this modification as it will mean that Supply Points transfer into Class 1 faster. This should result in a reduction in UIG due to gas being correctly allocated to the correct Supply Point and in turn support competition between Shippers.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

We agree that this modification meets self-governance criteria and could be implemented 16 business days after a panel determination.

None for WWU
