<b>Representative:</b>	Gary Fisher
<b>Organisation:</b>	Macquarie Energy Leasing (MAP)
<b>Date of Representation:</b>	07/11/2017
<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective:</b>	d) Positive

**Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

We support the rationale set out in the Modification Proposal that by removing the meter model as a requirement (for meters with a capacity up to and including 11m<sup>3</sup>), we will increase the resolution of data discrepancies between industry parties and assist with data cleansing.

**Self-Governance Statement: Please provide your views on the self-governance statement.**

Agree with statement

**Implementation: What lead-time do you wish to see prior to implementation and why?**

As soon as practical to realise operational benefits to industry

**Impacts and Costs: What analysis, development and ongoing costs would you face?**

There will be no implementation costs for MAPs as we will continue to submit data requests, but the change will improve the quantity of data received from these submissions. This is likely to reduce the cost of processing exceptions at MAPs, Suppliers and other interested parties and will improve accuracy of billing for MAP services.

**Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?**

Yes

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

No

**Please provide below any additional analysis or information to support your representation**

None
