Support or oppose implementation?	Support
Relevant Objective:	d) None f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We support the inclusion of the ESO into the Data Permissions Matrix and being recognised as a new user.

We support objective f relating to efficiency in the code but as this is only adding a new user recognition, we don't believe it meets objective d, this instead relates to the activity completed by the CoMC.

Self-Governance Statement: Please provide your views on the self-governance statement.

We support the self-governance as this is just adding them as a new user.

Implementation: What lead-time do you wish to see prior to implementation and why?

We support a joint IGT UNC and UNC implementation with the same coordinated date, this we believe better facilitates the CoMC. If approved at separate times the CoMC cannot approve until the last modification approval is given.

Impacts and Costs: What analysis, development and ongoing costs would you face?

As this is a permissions modification there are no costs associated.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

No comments.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No comments.

Please provide below any additional analysis or information to support your representation
