

## UNC Workgroup Individual Terms of Reference

### 0798 - Enablement of Exit Assignment process at Interconnectors

#### Introduction

This is an Individual Terms of Reference that includes matters referred from Panel or identified within any initial representations. It replaces the standard Terms of Reference.

#### Purpose of the Modification and its Solution

Please refer to [www.gasgovernance.co.uk/0798](http://www.gasgovernance.co.uk/0798)

The pan European Capacity Allocation Mechanisms Network Code (CAM NC), Article 19 Paragraph 6, allows for unbundled capacity at interconnectors to be traded on secondary markets. Uniform Network Code (UNC) Modification 0755S - Enhancement of Exit Capacity Assignments was implemented with the intent to enable unbundled capacity to be assigned at Exit Points.

Point 6 in the solution states “This functionality will be available at all Exit Points including DN Offtakes, Storage and Interconnectors, however any bundled Capacity would be excluded from this arrangement.”

However, In between these two codes, the European Interconnection Document (EID) currently prevents Assignment of Exit Capacity from taking place at Interconnectors.

It is proposed that this Modification amends the European Interconnection Document to remove the barrier between UNC and CAM NC compliance allowing full implementation of UNC 0755S and makes a minor change to the Legal Text to clarify the charges payable at an Interconnection point.
