

Exec Summary | 0835R Review of Gas Demand Side Response Arrangements

Agenda Item	Key Messages
Purpose of modification	<ul style="list-style-type: none">▪ Consumer feedback has highlighted that Demand Side Response (DSR) is an attractive and implementable proposition for a number of sectors. We have identified four workstreams which, if delivered, could further enhance the effectiveness of DSR and further bolster Great Britain's security of gas supply.▪ 0835R is a review proposal from which potential solutions can be developed which will grow the industrial DSR market and enhance the pre-emergency tools. <p>Proposed Workstreams:</p> <ol style="list-style-type: none">1. Enabling Direct Contracting for DSR between NGT and consumers2. Longer lead time product3. Eligibility and Aggregation4. Review of existing DSR arrangements post implementation of UNC Modifications 0822 and 0833
Impacted parties	<ul style="list-style-type: none">▪ High: Large industrial and commercial consumers, Shippers, Suppliers, National Gas Transmission, and OCM Market Operator▪ Low: Distribution Network Operators
How does this modification achieve it's purpose and the relevant objectives?	<ul style="list-style-type: none">▪ N/A – this is a Request document rather than Modification proposal. As a result, Relevant Objectives have not been assessed at this point.
Consumer benefit	<ul style="list-style-type: none">▪ Reduced risk of entering into a gas supply emergency. If this was to occur, it could lead to increased bills for consumers and there is potential for interruption to their gas supply.
Other	<ul style="list-style-type: none">▪ Current timelines suggest that a UNC modification(s) will be raised in April 2023 following the conclusion of the UNC Request workgroups when we will have received and considered stakeholder feedback on barriers, risks, opportunities and potential solutions.
