REVISED UK LINK MANUAL CDSP DATA SERVICES DOCUMENT - EXPLANATORY TABLE

Notes:

1. This table is based on the final proposed legal text for Modification 0613S.
2. Modification 0613S relates to the replacement of the existing UK Manual (which is now a CDSP Service Document, and therefore part of the DSC) with a new manual comprising a new framework document and a suite of new component documents.

DATA SERVICE CONTRACT			
CDSP SERVICE DOCUMENT - UK LINK MANUAL			
DSC Reference	Topic	BRDs	Explanation
UK Link Manual Framework Document	New UK Link Manual Framework Document	-	The existing UK Link Manual Framework Document was based on the UK Link Terms and Conditions in the Annex and was deemed to incorporate the existing UK Link Manual as defined and in force pursuant to old Section U. The purpose of the modification is to undertake a comprehensive rewrite and restructuring of the manual and therefore the existing framework document is deleted and replaced with (i) a new framework document setting out the new structure for the manual and identifying the individual component documents which make up the manual and (ii) the individual component documents.
Annex to UK Link Manual Framework Document	-	-	Again the existing terms and conditions have been updated, so the annex is also deleted, as the new terms and conditions now comprise one of the individual component documents identified in the New UK Link Manual Framework Document.
