Our reference:
Update on Meter
Temperature Analysis from
AUG Expert

Dear Colleague

At the last UNC AUG Sub-committee meeting, it was agreed that the AUGE would provide an early update on the progress of their analysis of meter temperature together with a view of the proposed approach. We are pleased to confirm that this has now been published on JoT.

Although the document is primarily for information, the AUGE would welcome any early feedback. We will consider any points raised when developing the Proposed AUGS. Any feedback received will be treated as being an early response to the consultation period due to begin after publication of the Proposed AUGS. Formal responses to any feedback will therefore be provided as part of the consultation process.

The AUG Expert would like to thank you for your support and cooperation. Please provide any feedback via the AUGE mailbox (auge.software@dnvgl.com).

Sincerely
for DNV GL

Tony Perchard
Principal Consultant
