

PAC Agenda Item 3.1

Isolated Sites With Progressive Reads

PAC 17th May 2022

Isolated Sites With Progressive Reads – May 2022

There are now 2640 MPRs which remain Isolated which is a reduction of 185 (7.01%) since the April update.

Actions Taken Since April PAC

- Contacted additional Shippers to highlight remaining Isolations within their ownership.
- Included a further communication to Shipper with Highest Amount of MPRs still Isolated (previously notified twice)
- Requested a response of proposed resolution actions by End of May to report at June PAC (response received from Shippers so far was very positive)

Further Actions

- Correla to investigate feedback from Shippers regarding Meter Removals against the progressive read dates.
- Correla / Xoserve to consider additional reporting options with DDP Team.
- Discussion regarding options currently on-going. Additional update to be provided to June PAC.

The logo for 'xserve' is centered within a stylized house frame. The house has a white background with a light blue diagonal line pattern. The house's outline is a simple grey line. The roof is a triangle, and the main body is a rectangle divided into four vertical panes by three grey lines. The text 'xserve' is written in a blue, sans-serif font. The 'x' is a dark blue, while the 'serve' is a lighter blue. The 'x' is composed of two overlapping shapes that resemble arrows pointing towards each other.
