

PAC Agenda Item 3.3

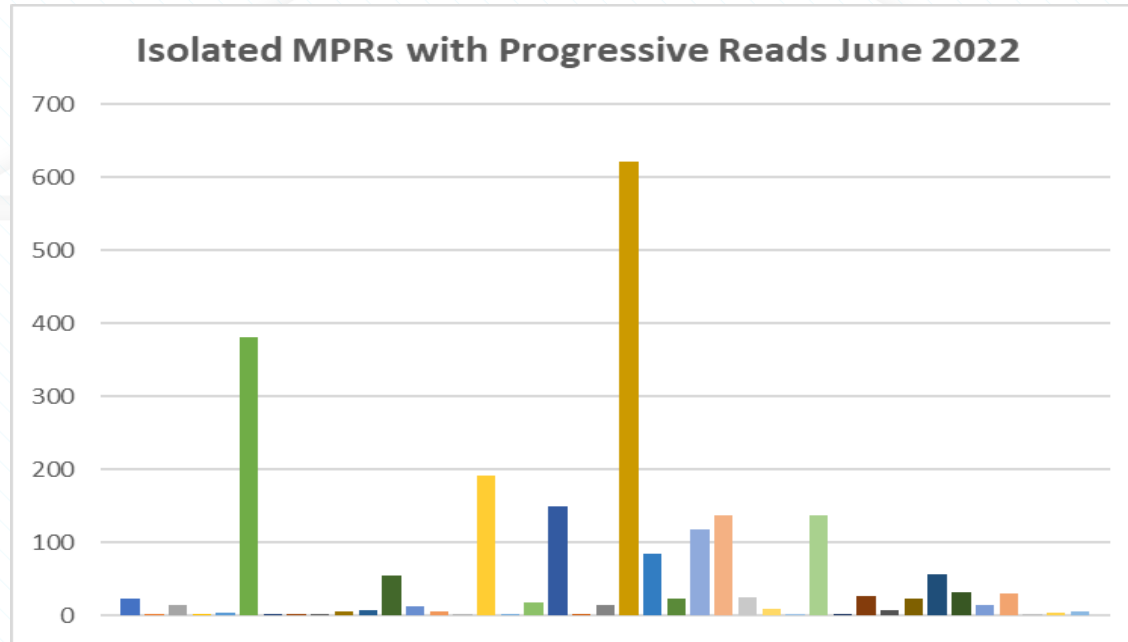

Isolated Sites With Progressive Reads

PAC 13th September 2022

Actions Since June 2022 Update

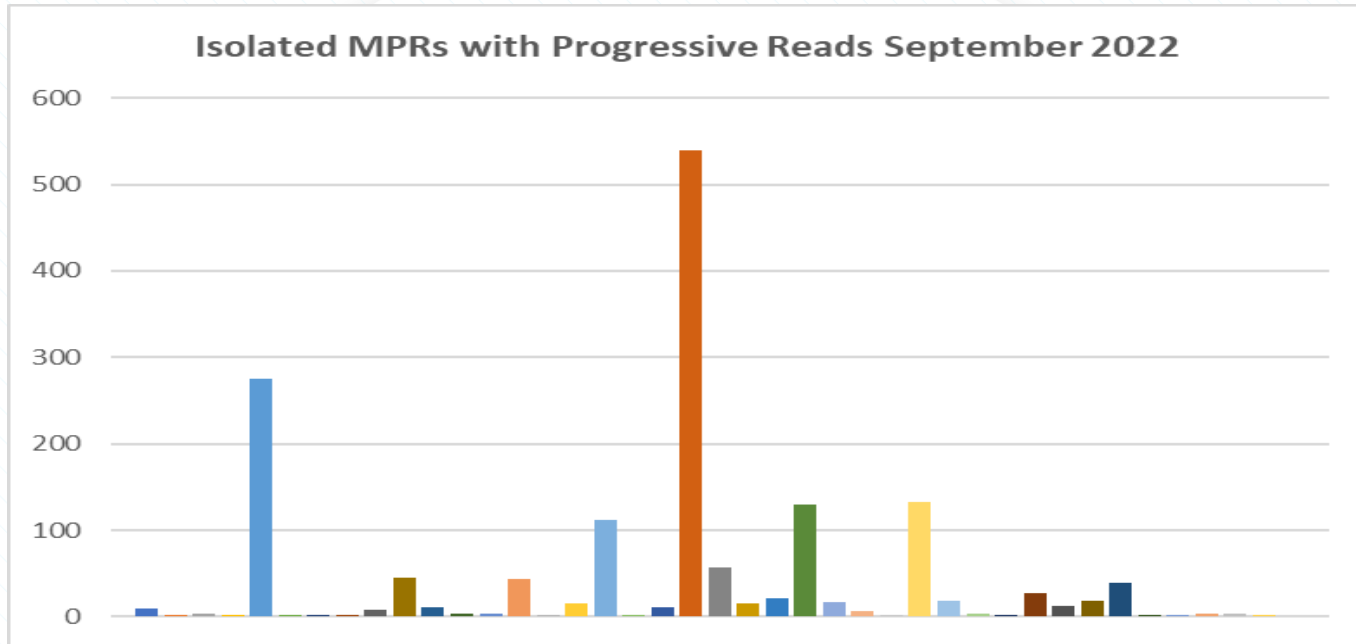

- Highlighted read rejections post Meter Removal date to impacted Shippers (27 Shippers). Requested updates by End of July
- Correla to arrange a meeting with highest contributing Shipper to confirm next steps and any further assistance we can provided

Isolated Sites With Progressive Reads – June 2022

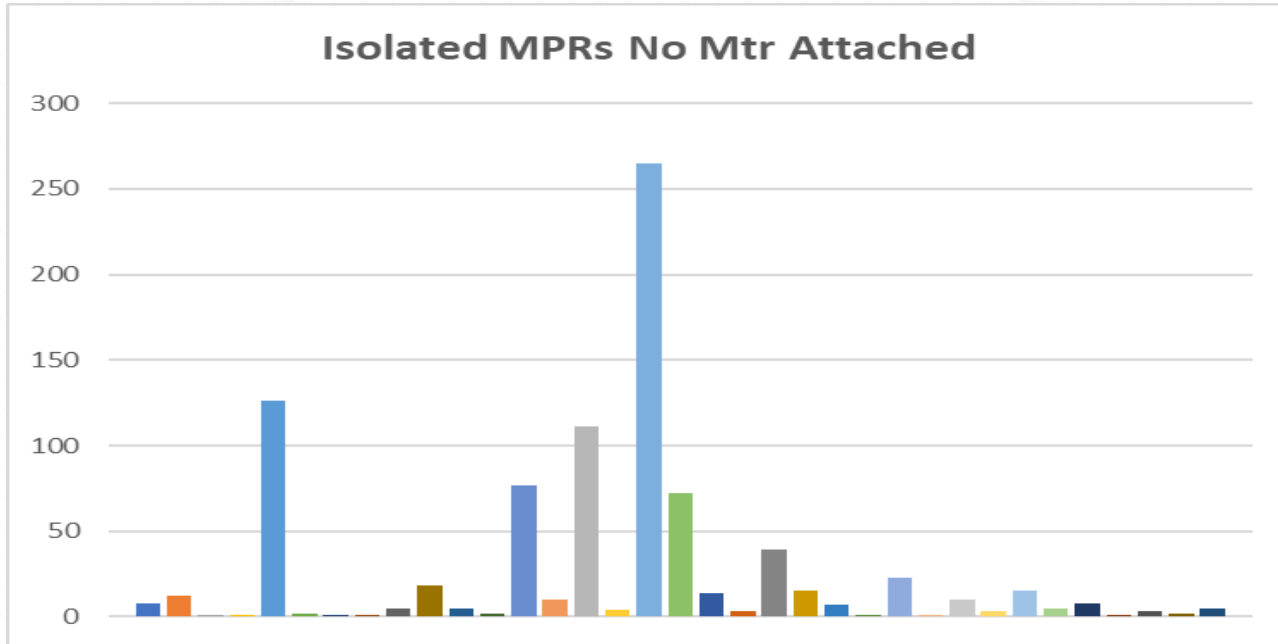

There is now a total of 2267 MPRs in the Isolated / Progressive Reads pot.

Isolated Sites With Progressive Reads – September 2022

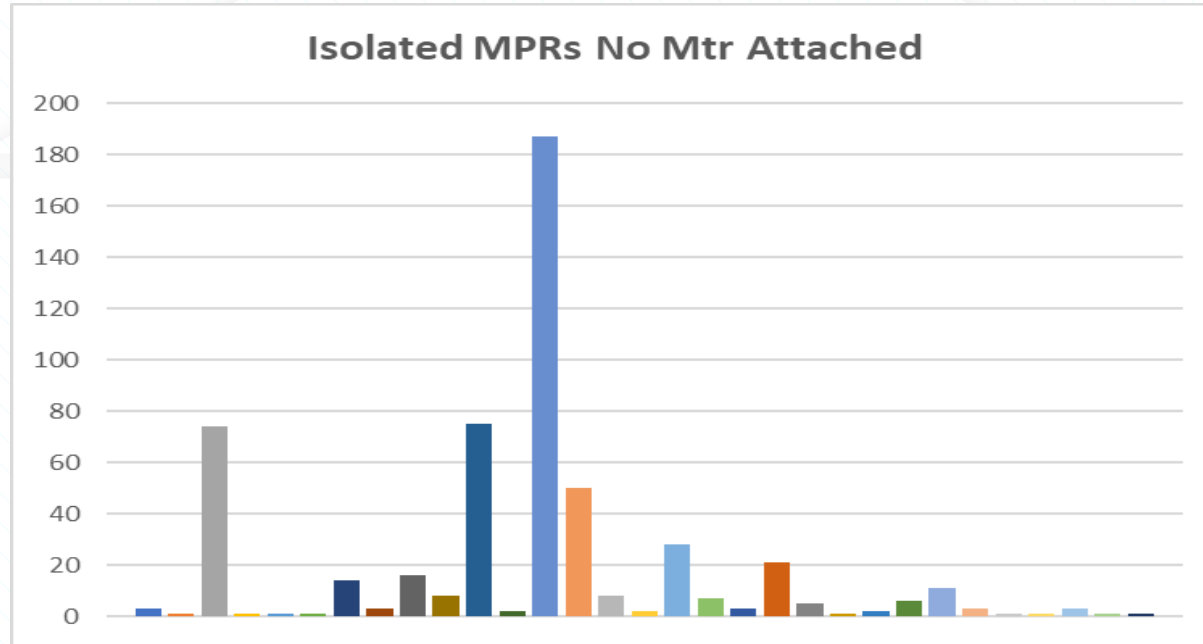

There is now a total of 1600 MPRs in the Isolated / Progressive Reads pot. This is a decrease of 667 MPRs since the June update (41.69%).

Isolated MPRs with Meter Removed

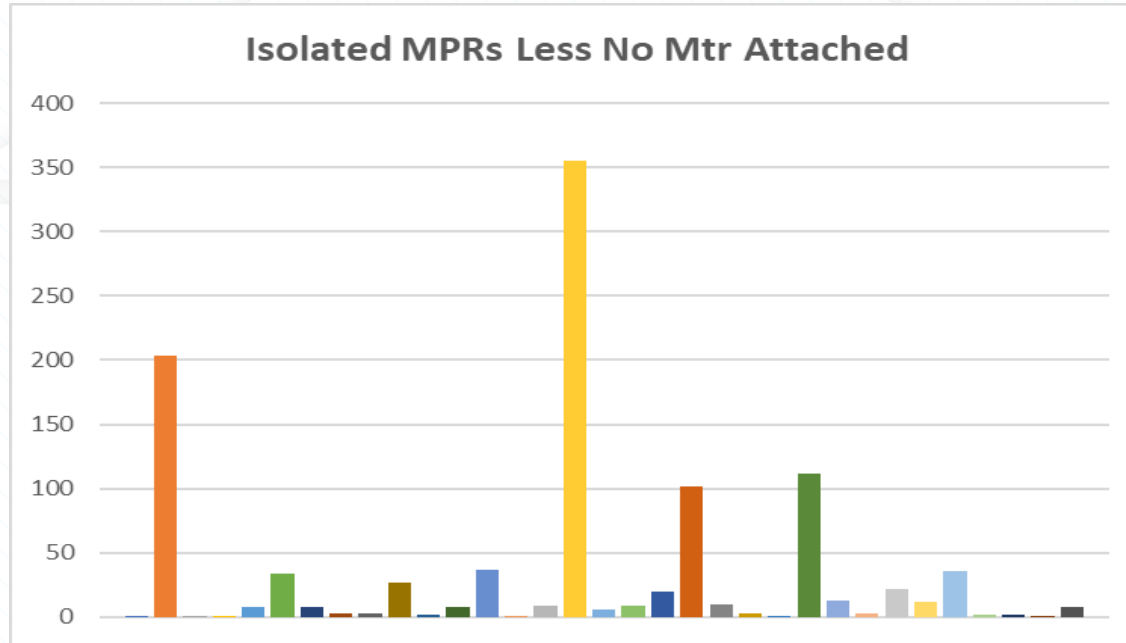

June update highlighted 876 MPRs where the meter had been removed.

Isolated MPRs with Meter Removed

Decrease to 663 (24.32%) in September. This is due to 125 Meters now being Re-connected and 88 withdrawals so sites now Shipperless

Isolated MPRs Less Meter Removals

Remaining 1063 MPRs Isolated and Meters still attached. This is a decrease of 5731 MPRs (84%) from the original 6794 highlighted by the AUGE. Highest contributor now has 33% of this pot

Next Steps

- Work with CAM to organise a call with the highest contributing Shipper. Already made multiple attempts.
- Continue to monitor the progress of the Isolations pot and report progress to PAC.

The image features a stylized house-shaped frame with a gabled roof and a window. The window is divided into four vertical panes. The logo 'xserve' is centered within the window. The 'x' is composed of two overlapping blue shapes, and 'serve' is in a blue sans-serif font. The background has a light blue diagonal line pattern.
