REPLACED READS

- **78% increase** in Value at Risk reported in June 2022. This was driven by the use of the read replacement process, which had increased by 111% throughout April 2021 to April 2022.
- PAC requested further investigation into whether this was Shipper specific.
- Following further investigation there are two Shippers which have driven the rise over the past 12 months.
 - Bucharest – over 94,000 replaced reads in December 2021
 - Nuuk – over 100,000 replaced reads in March 2022
