# Capacity Methodology Statement Review

- Substitution
- Transfer & Trade

Transmission Workgroup

February 2023

**nationalgrid**

# Background

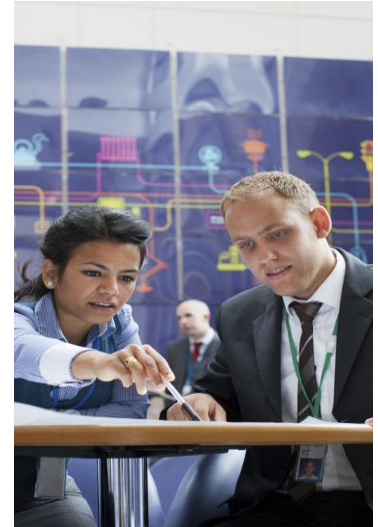

The NTS Gas Transporter Licence sets obligations on National Grid to produce statements setting out various capacity methodologies. Each statement must be consulted on at least every two years.

We will soon begin formal consultation on the following methodologies:

- ECS: Entry Capacity Substitution
- ExCS: Exit Capacity Substitution
- ECTT: Entry Capacity Transfer & Trade

All three statements have minor housekeeping changes only.

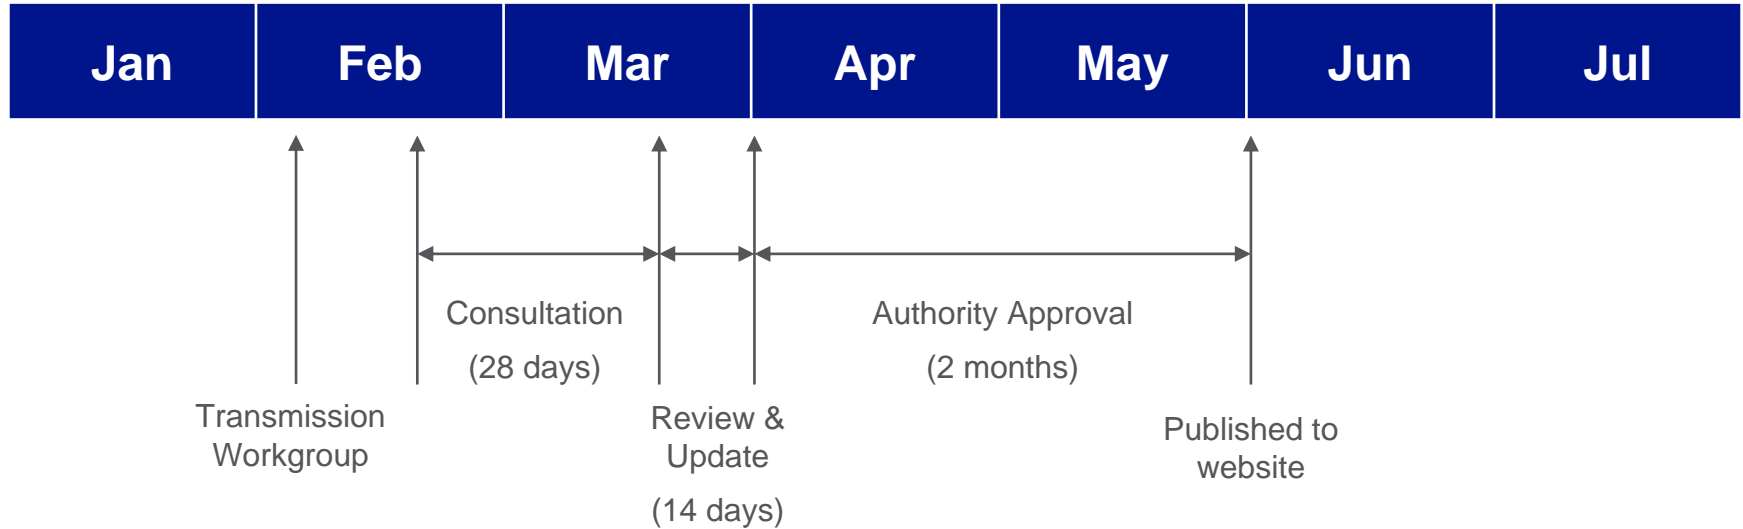

Methodology Statements are available on our website: <https://www.nationalgrid.com/gas-transmission/capacity/capacity-methodology-statements>

[Entry Capacity Release consultation has already commenced, led by Anna Stankiewicz, Exit Capacity Release review is due in June 2024 ]

# Timescales

Consultation on the three methodology statements are expected to follow the timetable outlined below:

Responses should be sent to: [box.gsoconsultations@nationalgrid.com](mailto:box.gsoconsultations@nationalgrid.com)

In the meantime, please contact [Kirsty.Appleby@nationalgrid.com](mailto:Kirsty.Appleby@nationalgrid.com) if you have any questions or if you think any additional changes should be considered
