

Gas Transmission

Alignment of TPD Section I Licence Reference to the current National Grid Licence

Pre-Modification

Ash Adams

nationalgrid

Why Change

- Housekeeping Modification to update a reference within TPD Section I to align it to the National Grid Gas (NGG) Licence applicable from 01 April 2021.
- UNC 0774S, implemented on 08 October 2021, made changes to the references to align to current NGG Licence. However, this specific reference was not noticed, as it references the TPCR4 rather than RIIO-T1 licence.
- An amendment is proposed to UNC TPD Section I in order to correctly align to the Conditions in the current NGG Licence.

Solution and Governance

Solution:

Amend UNC TPD Section I 3.11.1 (a):

an "LDZ System Entry Point" is a System Entry Point on a DNO's System and that is not listed as an Entry Point in ~~Schedule A, Table A2-Appendix 1 of Special Condition 9.13.15~~ of National Grid NTS's Licence;

Governance:

Recommend to be considered a non-material change and subject to Fast Track Self-Governance
