

Pre-Meeting note for DESC Meeting on 19th July 2022

Key Agenda Items - Summary

2.0 2022/23 NDM Algorithms – Review Industry Representations: **VOTE REQUIRED**

- DESC will be asked to vote on whether to provide final approval of the draft proposals following the completion of the wider industry consultation period (at time of writing no comments have been received)

3.0 Weather Station Review: **FOR INFORMATION**

- Each year we review the current list of Gas Industry weather stations and consider any possible risks/issues which may need to be addressed based on the latest intelligence available

4.0 Seasonal Normal Review 2025: **FOR INFORMATION**

- Early engagement with DESC to consider what may be needed, particularly with regards to a Climate Change Methodology, for the next Seasonal Normal Review due to take effect in 2025.

5.0 Agreement of Ad-Hoc Workplan: **VOTE REQUIRED**

- DESC will be asked to approve the proposed list of workplan items for the upcoming autumn/winter period. Progress on the agreed programme of work will be reported to DESC at its meetings in October, December and March.

6.0 DESC Survey: **INPUT REQUIRED**

- DESC Members and Technical Workgroup Representatives will be asked to complete a shorty survey to capture their views on the performance of the Demand Estimation team in meeting DESC's UNC obligations.
