

## UNC Variation Request

### **0664V – Transfer of Sites with Low Valid Meter Reading Submission Performance from Classes 2 and 3 into Class 4**

**Date:** 05 November 2020

The Proposer, SSE (Mark Jones), requests a variation to this Modification, pursuant to UNC Modification Rules Section 6.5.1(c) of the UNC.

#### **Reason for Variation**

Concerns have been raised by Gazprom that under the consequences introduced under 0664V performance measures and a poorly performing supplier could impact a better performing supplier that was under the same shipper.

#### **Nature of Variation**

Amendment of Business Rule 10 to state that the 90% portfolio target relates to each Shipper and Supplier combination and not solely to Shipper portfolios.

This change will require a change to the legal and also to the reporting requirements, but the CDSP has indicated that the change is not material from a reporting point of view.
