# EU Hydrogen & Gas Decarbonisation Package

The EC is reviewing the Gas Directive 2009/73/EC and Gas Regulation (EC) No 715/2009

A public consultation on the revision was launched in late March, closing in mid-June 2021

The aim is to evaluate the relevant gas market rules and, in particular, what reforms may be needed to reach the EU decarbonisation targets

The feedback from the consultation will inform the Commission's preparations of legislative proposals for a new hydrogen and gas markets decarbonisation package

These proposals are expected to be produced before the end of 2021
