

UNC Variation Request

0730 – COVID-19 Capacity Retention Process

Date: 7 December 2020

The Proposer, Gazprom Energy, requests a variation to this Modification, pursuant to the Uniform Network Code (UNC) Modification Rules paragraph 6.5.1(c).

Reason for Variation

To ensure that the solution and intent of this UNC Modification aligns correctly with the latest iteration of the legal text (as amended).

Nature of Variation

The following amendments are proposed

Addition of a new business rule

BR5: To qualify for relief i.e. capacity retention charge under this modification the relevant Shipper will be required to warrant to the CDSP within 20 Supply Point Business Days of receipt of a notification from the CDSP of the opening of a relevant claim period that the relevant Supply Meter Point(s) are subject to the relevant restrictions relating to their operation under the COVID Regulations e.g. the nature of business conducted at the site and the geography
