

**Please see below the implementation email which confirmed DDP MOD664 dashboards are live, this was the action to include this communication in the CHMC slides:**

Dear all,

I'm writing to inform you of the implementation of the DDP Shipper dashboards that form part of the XRN4990 change (Mod 0664).

Mod0664 and its associated project, XRN4990, places an obligation on the Central Data Service Provider (CDSP) to move sites from Class 2 to Class 3 and 4 following a consecutive period of low meter reading submission performance.

As part of the programme to apply this obligation, we've released a set of dashboards to enable Shippers to track their portfolios to identify sites eligible for CDSP reclassification. Data will be made available in these dashboards proactively on a month by month basis, as well as following three months of read submission monitoring.

It should be noted that while the dashboards are now visible, data will only start to be populated for the monthly view by the middle of April (after the first month of calculations), for the three monthly view by June, and any retrospective classifications later still.

Information on the change is included in the release comms here:

[https://rise.articulate.com/share/dmgMWdMwtveaf47sp7vFG5XORn\\_OGH8I#/](https://rise.articulate.com/share/dmgMWdMwtveaf47sp7vFG5XORn_OGH8I#/)

Further FAQs on the DDP dashboards, including where they will be situated, is available here:

<https://rise.articulate.com/share/Hl4MAn7GOk6C8SmRBXl434s1iKxux93a>

We will provide further information at next week's DDP Shipper forum, on the 9<sup>th</sup> March, and more detailed material on the dashboards will be available prior to the first data being visible in April.

Kind regards,

David
