

## UNC Provision of Legal Text Report by Email

### 0613S - Revised UK Link Manual CDSP Data Services Document

**Date:** 09 July 2017

**Organisation:**

Cadent

**Abstract:**

Joint Office,

I note that the legal text for this Modification has been formally requested by the UNC Modification Panel and is due today. As you know Cadent has raised UNC Modification Proposal 0620 which is due to be presented at next week's UNC Modification Panel. This seeks to extend the deadline to October 2017 for establishing the new UK-Link Manual in the DSC thereby providing the industry with more time to scrutinise and agree the extensive series of changes to the Manual.

Consequently, assuming Modification 0620 is implemented, the early conclusion of assessment and reporting of Modification 0613S is no longer an imperative. Therefore, Cadent would like to propose that the immediate date for text provision be deferred. This will permit more time for any changes to be made to Modification 0613S should the need arise from Workgroup discussion and for any subsequent legal text to reflect this.
