The Workgroup Report is due to be presented at the UNC Modification Panel by 21 July 2022.

1.0 Outline of Modification

Loraine O'Shaughnessy (LOS) welcomed all to the meeting and advised workgroup, that this Request presented at the October UNC Panel meeting and it was recommended by the proposer to discuss alongside the 0778R Vacant Sites review group.

LOS also noted that slides for this Request had been updated prior to the meeting and the Workgroup Members were unlikely to have reviewed them.

LOS invited Andy Clasper (AC) to introduce the Request.

AC explained this Request was proposing a review of the Annual Quantity (AQ) correction processes which are set out within the Uniform Network Code (UNC). This review should assess whether the current arrangements meet the objectives for the setting of the AQ and identify and consider possible amendments that are required to UNC.

AC presented the proposed topics of discussion for the future Workgroup meetings. The Workgroup agreed with the proposals.

AC briefly presented the AQ Review MI slide pack explaining that it set out the background to the review, its scope as well as the current processes for AQ correction alongside supporting analysis. AC noted that Workgroup were being asked to review the slides in preparation for the next review meeting and to consider the current AQ correction process and the need for remedies where there has been incorrect use of the AQ correction process.
