

# UNC 0821:

Mod Title: Alignment of TPD Section I Licence  
Reference to the current National Grid Licence

Proposer: National Grid NTS

Panel Date: 15/09/2022

# Why change?

- This housekeeping Modification proposes to update a licence reference within TPD Section I to align it to the current National Grid Gas (NGG) Licence.
- In 2021, UNC 0774S made changes to licence references to align them to the current NGG Licence. However, this specific reference was omitted.
- The reference relates to a table of NTS Entry Points which can be found in Appendix 1 of Special Condition 9.13 in the current NGG Licence.
- An amendment is proposed to UNC TPD Section I in order to correctly align to the Conditions in the current NGG Licence

# Options

- There is only one option: To make an amendment to UNC TPD Section I 3.11.1 to correctly align the UNC to the Conditions in the current NGG Licence

# Solution

- Amend UNC TPD Section I 3.11.1 (a) as detailed below:

an "LDZ System Entry Point" is a System Entry Point on a DNO's System and that is not listed as an Entry Point in ~~Schedule A, Table A2~~ **Appendix 1 of Special Condition 9.13** of National Grid NTS's **Gas Transporter's** Licence;

# Recommended Steps

- The Proposer recommends that this modification should be:
  - Subject to Fast Track Self-Governance because it is a housekeeping modification that seeks only to update a reference to a previous licence with a reference to the current RIIO-T2 licence.
