**Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

It is important that whenever possible, representation in the DSC Committees is undertaken in the relevant constituency group by a party from that classification of customer type. Those parties are best placed to fully understand the risks and issues that may affect them, and whilst we recognise that smaller parties are often willing to have their views articulated by larger parties, the arrangements need to facilitate their involvement in the governance of the industry arrangements, even if this comes outside of the normal election cycles.

**Self-Governance Statement:** *Please provide your views on the self-governance statement.*

I support the self-governance statement in the modification, as this doesn't materially change the governance arrangements, but at the same time presents a mechanism to improve the engagement of the smallest parties in the DSC arrangements, as envisaged by the original contract.

**Implementation:** *What lead-time do you wish to see prior to implementation and why?*

As soon as the appeals window on any decision the panel makes is closed.

**Impacts and Costs:** *What analysis, development and ongoing costs would you face?*

None

**Legal Text:** *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

No

**Please provide below any additional analysis or information to support your representation**
