Representative:	Mark Jones
Organisation:	SSE Supply
Date of Representation:	5 th August 2017
Support or oppose implementation?	Support
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

SSE agrees with the proposer that increasing the number of meter readings submitted into the settlement system should lead to an increase in the accuracy of gas settlements and allocation, and that this action will ensure that less gas is left unreconciled at the line in the sand.

Since December 2014, under the Gas Supplier Licence (SLC 21B.4) there has been a requirement on the licensee to take all reasonable steps to obtain a meter reading for each of its Customers at least once every year. This at least annual read should be submitted to enable gas settlements to become more accurate at very little marginal cost.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

The modification should be implemented as soon as possible.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None identified.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No.

Please provide below any additional analysis or information to support your representation
