<b>Representative:</b>	Colette Baldwin
<b>Organisation:</b>	E.ON Energy Solutions Ltd
<b>Date of Representation:</b>	24 <sup>th</sup> July 2017
<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective:</b>	d) Positive

**Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

In the absence of an Annual AQ Review calculation, it is important to ensure the accuracy of charges that the AQ is regularly verified and amended as appropriate. The introduction of new settlement classes and rolling AQ will naturally encourage the provision of more readings into settlement as only validated, accepted readings will be used for settlement and rolling AQ calculation.

**Implementation:** *What lead-time do you wish to see prior to implementation and why?*

This should be implemented once the Nexus Modifications 432 & 434 are fully implemented, as Modification 434 will facilitate asset and reading corrections.

**Impacts and Costs:** *What analysis, development and ongoing costs would you face?*

There are no additional costs or impacts as we have designed our processes for the use of the new settlement classes. Having obtained a reading and provided it passes our validation checks and meets the submission criteria set by the UNC it will be submitted into settlements.

**Legal Text:** *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

No

**Please provide below any additional analysis or information to support your representation**
