

# Alrewas MTD Metering Error (EM009) Update

- Meeting 01 September:
  - Anticipated Error Range 4.5 % - 7.5 % which equates to 650 to 1050 GWh
  - Guidelines require a second ITE, if error greater than 500 GWh
- Meeting 29 September:
  - SMER to be shared in detail by TÜV SÜD
  - Next steps on second ITE:
    - Rules relating to appointment second ITE
    - Options for Terms of Reference: audit & review of SMER or first principles
    - If second SMER, how to process and assimilate second ITE output:
      - How to reconcile differences and finalise energy quantities
- This slide is for UNCC awareness:
  - Next steps & recommendation to be discussed at Offtake Workgroup
  - Expect return to October UNCC for recommendation ratification
