15 February 2006

Dear Julian,

UNC Modification Proposal 005 'Provision of a Guarantee of Pressure for Meter Points operating above 21 mbar by the Relevant Transporter'

Further to your email of 26 January 2006, I can confirm that Ofgem is still considering modification proposal 005 (formerly Network Code modification proposal 726). As you will be aware, there are a number of complicated issues associated with this proposal, which Ofgem will need to fully consider before reaching its decision.

I understand that this proposal is due to be reconsidered at the Modification Panel meeting of 16 February 2006. Whilst it is at the Panel's discretion what it wishes to do with the proposal, in accordance with Modification Rule 9.7.2, Ofgem is not of the view that the proposal requires re-consultation at this time.

Further, whilst I am not yet in a position to give a 'minded to' view on this proposal, we would hope to come to a decision in the next month.

Yours sincerely
