**Response to Modification proposal 735 Amendment to minimum
notice required for UK Link changes**

Dear Julian

E.ON UK supports the implementation of this modification proposal. The proposal should introduce more clarity and transparency, presenting a more straightforward process in the UK-Link implementation procedures.

There are, however, some aspects of the proposal, which would need to be clarified in the legal text. It is necessary, for example, where 6 months notice might be given for changes impacting systems and software to establish whose system and software this applies to. Furthermore, clarification is needed in regards to whom, or which committee, decides whether or not a change impacts systems and software.

We look forward to the timely implementation of this proposal.

Yours sincerely

Christiane Sykes
