Dear Tim

Modification Report on Modification Proposal 0017 "Amendments to the provisions governing 'failure to obtain readings'"

ScottishPower Energy Management Ltd (SPEML) welcomes the opportunity to comment on this modification report. We would like to make the following comments:

SPEML are in support of this Modification since we believe that it will give Shippers the opportunity to investigate any anomaly within the technical data held by the DN Owners prior to any further charges being applied. This will afford Shippers the opportunity to investigate and resolve issues without incurring any additional cost.

Yours sincerely

Lorraine McGregor
