Dear Julian

RE UNC Modification Proposal 0045 – Provision of Available Interruption Information

Thank you for the opportunity to comment on this Modification Proposal.

This Modification Proposal would require each Distribution Network Operator to provide information on the amount of capacity made available on its network is interruptible. This information is necessary as an input to the planning processes undertaken by Transporters to with comply with their licence obligations.

The Modification is necessary to collect and co-ordinate this information across all networks which was previously available from DNCC.

We believe that it would further the relevant objectives of a co-ordinated, efficient and economic operation of the combined pipe-line system. We are therefore supportive of the implementation of this proposal.

Please contact me if you require any further information.

Yours sincerely,

Mike Young
Commercial Manager
