Abstract

Dear Julian

Re: Modification Proposal 0045

Wales and West Utilities supports the implementation of Modification Proposal 045 "Provision of Available Interruption Information."

WWU believes that this proposal furthers the code relevant objective, set out within Standard Special Condition A11.1b of the Gas Transporters Licence, of facilitating the co-ordinated, efficient and economic operation of the combined pipe-line system.

WWU understands that this modification can be implemented by our System Operator Service Provider (National Grid DNCC) for winter 2005/6. However further work is required to complete an impact assessment for future years when system changes will require a different solution. This work has been commissioned from the Service Provider but is not available to include in this response.

Yours sincerely

Liz Spierling
