Dear Julian

Urgent Modification Proposal 0067: Compensation Payments to Users whose gas flows are curtailed following instruction from the NEC

SSE Hornsea Ltd supports the implementation of Modification Proposal 0067.

As you are already aware, we are extremely concerned that the changes made to the NEC's Safety Case earlier this year could see Storage Users prevented from accessing their own gas in store prior to market suspension.

The current situation undermines future investment in storage capacity and prejudices security of supply. Experience of this winter so far can only serve to underline the increasing importance of continued investment in new and existing storage capacity as indigenous UK gas supplies decline.

Yours sincerely

Duncan Williams
Commercial Operations Manager
