"Amendment of Network Entry Provisions at the European Interconnector sub-terminal at
Bacton "
Version 0.1

Date of Communication: 09/01/2006

Abstract

RWE npower supports the above modification proposal as we believe it will enhance security of supply by increasing the opportunities for more gas to be made available for import through the Bacton - Zeebrugge inter-connector.

In that the proposal will not change any of the GSMR parameters we do not believe it will have any impact on our power station operations or emmissions. However, we understand the Environmental Agency are aware of the issues arising from this modification proposal and welcome their willingness to consider reviews of individual power station gas parameters where necessary in the event proposal is implemented.

Regards,

Steve Rose
