Dear Julian,

Representation for UNC0082 “Clarificatory revisions to UNC Section Q – Emergencies”

Thank you for providing National Grid Gas (UKT) with the opportunity to comment on this Modification Proposal (UNC0082).

As the initiator of UNC0082, National Grid Gas (UKT) continues to support its implementation for the reasons contained therein.

We would like to thank the Joint Office of Gas Transporters for providing feedback and suggested several minor changes to the draft legal text that was originally issued with UNC0082.

As these suggested changes are non-material and do not effect the original intent of UNC0082, we have taken the opportunity to incorporate these into a ‘final’ draft of the legal text. In order to provide transparency of these changes, we have attached revised copies (change tracked) of the High Level Summary of Changes (Appendix A) and the proposed draft legal text for Section Q (Appendix B) to this representation.

Yours sincerely

Steve Pownall
