Abstract

Modification Proposal 0082: Clarificatory revisions to UNC Section Q - Emergencies

Thank you for providing SGN with the opportunity to comment on the above modification proposal.

SGN supports the proposal.

In as far as revisions are intended to be clarificatory only we believe proposed changes are helpful. We believe the amended structure is more logical and aids understanding of arrangements and processes. We believe revised terms and definitions also help add clarity and improve understanding. In this way SGN believes the modification proposal will better facilitate achievement of the relevant objectives, namely efficient and economic operation of the pipe-line system and help ensure the efficient discharge of Licensee's obligations under Licence.

We note that should the proposal be implemented there would be no impact on systems or processes. As such implementation should be relatively straightforward. As suggested by the Proposer, we believe implementation should be ahead of next winter. We believe August 2006 should be achievable.

We hope you find these comments helpful.

Regards

Beverley Grubb
