Dear Julian,

RE: UNC Modification Reference Number:- 0093 - Amendment of Interconnector UK's Meter Flow Rates

Thank you for the opportunity to comment on this draft modification proposal.

Having reviewed the proposal, we conclude that this is a very straightforward administrative change, without which the capacity of the interconnector will be artificially constrained.

Given that the physical work to achieve these higher flow rates has already commenced and/or been completed, we can see no reason not to lend our support to this proposal. We would therefore agree with this change being implemented as soon as reasonably practicable, and at least in advance of this coming winter 2006/07.

Please don't hesitate to contact me if you have any queries about this response.

Yours sincerely

Chris Wright
Contracts manager
