Dear Julian

**Modification Proposals 0098 and 0098 a**

Thank you for providing Scottish and Southern Energy plc (SSE) with the opportunity to comment on the above modification proposals.

SSE is supportive of the proposal 0098 and is **not** supportive of proposal 0098a.

SSE agree that a common methodology placed within the UNC will provide a clear consistent approach in the event of a potential or actual gas deficit emergency.

SSE support the proposal of defined sequential steps that include nominations if OPNs are unavailable on day one of an emergency, when calculating the ECQ.

SSE believe that the above changes will ensure efficient and economic operation of the network by ensuring the best estimate of projected gas usage is available to transporters in the event of a GDE.

Yours sincerely

Jeff Chandler
