Dear Julian

Modification Proposal 0121

Thank you for providing Scottish and Southern Energy plc (SSE) with the opportunity to comment on the above modification proposal.

SSE is not supportive of this proposal.

Although SSE is generally supportive of the release of information to increase transparency in the market we feel this is secondary should competition be adversely impacted.

SSE believes that competition between certain customers groups could be adversely affected by this proposal. By publishing demand data for NTS exit points for both I&C and power stations and not publishing data for similar customers who are DN connected is unduly discriminating and confers an unfair competitive advantage on those customers who are DN connected.

SSE believe that the Modification Proposal 130 as raised by E.ON UK that aggregates the previous day's demand usage into 4 categories will facilitate the benefits of more transparent information but without adversely impacting on competition between similar NTS and DN customer groups.

Yours sincerely

Jeff Chandler
