Dear Julian

### **Modification Proposal 0130**

Thank you for providing Scottish and Southern Energy plc (SSE) with the opportunity to comment on the above modification proposal.

SSE is supportive of this proposal.

Although SSE is supportive of transparency of information, we did not support modification proposal 121 because it was believed that competition between certain customers groups could be adversely affected. Publishing individual demand data for NTS exit points for both I&C and power stations and not publishing data for similar customers who were DN connected was believed to be unduly discriminating and conferred an unfair competitive advantage on those customers who were DN connected.

SSE believes that this modification proposal because it aggregates the previous day's demand usage into 4 distinct categories will facilitate the benefits of more transparent information without adversely impacting on competition between similar NTS and DN customer groups. We therefore believe it better facilitates the relevant objective A11.1 (a) the efficient and economic operation of the pipeline system by providing all shippers with improved transparency of information.

Yours sincerely

Jeff Chandler
