2 March 2007

Dear Julian,

Representation for Modification Proposal 0130: “The Provision of Ex-Post Demand Information for NTS Offtakes”

Wales & West Utilities (WWU) gives qualified support to the implementation of Modification Proposal 0130. As stated in our response to Modification Proposal 0121, WWU supports the principle that where data is widely available it should be published in a format that allows **all** market participants [access to it](#). The National Grid Information Exchange website provides a suitable platform for these publications.

Whilst this Proposal addresses some of the concerns raised in responses to Mod 0121 regarding commercial sensitivity it does not resolve any the other issues raised regarding asymmetry of information or the usefulness of this information in informed decisions making.

We do not believe that it has been demonstrated that the publication of the information proposed in the Modification would in any meaningful way result in improvements in the efficient or economic operation of the pipeline system or the efficient discharge of the licensee's obligations under licence.

Yours faithfully

Liz Spierling
Commercial Manager
Wales & West Utilities
